TRUE OR FALSE

THE WATER PIRATES OF CHESAPEAKE BAY

Read the paragraph below and then answer the True/False questions. Ask an adult if you need help.
EXTRA CREDIT: Read the article to someone else. Quiz them by asking the True/False questions.

WHAT DO YOU KNOW ABOUT CONSERVING WATER?

Water is used by every human, plant and animal on the planet. We use water for cooking, cleaning and drinking. It's very important to save water and there are many ways you can help. Make sure you turn off the water when you brush your teeth or wash your hands. Ask your parents to fix leaky faucets and always use a shut-off nozzle on your hose when you are washing your family car or your bike. It is also important to use drains properly. Don't flush wipes, even those labeled "flushable," and never flush things like dental floss, paper towels, tissues or diapers. Can you think of any other ways to save water?

Use What You Need, Need What You Use!

T / F 1. Water is not used by humans.

T / F 2. We use water for cleaning and drinking.

T / F 3. You should turn off the water when you brush your teeth.
