

8

great ways to

SAVE WATER

INSIDE

OUTSIDE

1 Take 4 minute showers. Cutting your shower time from 7 to 4 minutes will save up to **36** litres of water.

2 Turn off the tap when brushing your teeth. This can save up to **5** litres a minute.

3 Only wash laundry when you have a full load.

4 Fix any dripping taps or leaking toilets.

5 Set your lawn mower's cutting height to **3** centimetres or higher to avoid cutting your lawn too short. This will reduce the amount of water your grass will need.

6 Use a broom or blower to clean outside, not the water hose.

7 Design a water wise garden and use drought-tolerant plants.

8 Reduce your fixed spray sprinkler run time by **2** minutes and switch them off when rain is forecast.
